

**AQUASAVER® SYSTEMS**

in sink erator®

## LOOK FORWARD TO OPENING YOUR WATER BILL.

InSinkErator® disposers with the AquaSaver® control system can reduce the water your foodservice operation uses by up to 70%. Unlike other systems, AquaSaver senses waste loads, automatically delivering only the water necessary for efficient use — saving hundreds of gallons of water each year.

### SAVINGS POTENTIAL IN ONE YEAR

Region	SS-200 Approx. 2 Hours Daily Use	SS-500 Approx. 4 Hours Daily Use
Boston, MA	\$2,920	\$6,675
Charlotte, NC	\$1,362	\$3,114
Fort Lauderdale, FL	\$1,391	\$3,180
Houston, TX	\$1,655	\$3,782
Nashville, TN	\$1,603	\$3,664
Seattle, WA	\$3,721	\$8,505

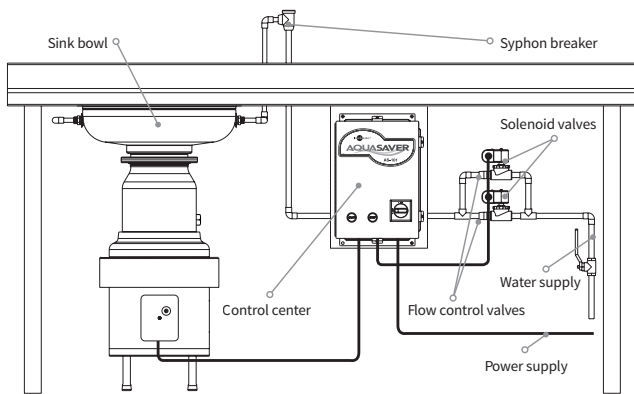

Water savings are calculated from the water and sewer rates from the 2010 Water and Wastewater Rate Survey, published by American Water Works Association, and are based on noted disposer operating for 2 hours per day, 365 days a year.

### Need to cut water usage? Just go with the flow.

- Automatically regulates water flow to grind load
- When less water is needed, less is used
- Reduces annual water and sewer costs
- Can be used with any InSinkErator disposer
- Easy to install and built to last

### TYPICAL INSTALLATION SINK BOWL

Dish table, plumbing, and electrical connections sold separately

### The water-saving system that pays for itself in as few as three months.

AquaSaver serves as an on-demand water-saving system. By sensing the load of the disposer and using two solenoid valves to regulate flow, it automatically provides the right amount of water required for optimum disposer usage. By saving up to 70% on incoming water and outgoing sewer charges, AquaSaver pays for itself in as few as three months.

Reducing water flow impacts your cash flow. Discover your savings using the AquaSaver calculator at [www.insinkerator.com/foodservice](http://www.insinkerator.com/foodservice)
